АПвЭгаАкПнг-30 1x120 ТУ У 31.3-00214534-058:2007

Single-core power cables with aluminium conductor, flame-retardant, with XLPE, aluminium-wire armoured, with longitudinal and transverse screen sealing, with polymer compound outer sheath

Due to non-magnetic armour, cables operate at AC Technical cable requirements correspond to IEC 60502-2

Cables are used for laying:

- · in places, where small mechanical impacts on cable are possible, including tensile forces
- in premises, tunnels, ducts, mines, dry soil and outdoor under shelter
- · single laying

It is possible to manufacture cables with extruded semiconductor layer along outer sheath.

Order entry example:

АПвЭгаАкПнг-П-30 1х120/16 ТУ У 31.3-00214534-058:2007

An extruded semiconductor layer along outer sheath ensures the correct testing of cable line with sections of underground laying in polymer pipes.

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

АПвЭгаАкПнг-30 1х120/16 (ОМ) ТУ У 31.3-00214534-058:2007

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

It is possible to manufacture cable with

Order entry example:

АПвЭгаАкПнг-30 1х120/16 (ожк) ТУ У 31.3-00214534-058:2007

It is possible to manufacture cable with sealed conductor.

Order entry example:

АПвЭгаАкПнг-30 1х120/16 (г) ТУ У 31.3-00214534-058:2007

It is possible manufacturing of cables in versions (A) and (B), flame-retardant when laying in bunches

Fire safety code in accordance with ДСТУ 4809:2007: ΠБ101122000

Products of this mark meet the requirements:

- · single wire cable flame retardance
- toxicity class Tk1 of the combustion products of nonmetallic elements (toxicity index from 13 up to 40 g/m³)
- class $\mathcal{L}T\kappa 1$ on smoke-forming ability by smouldering of non-metallic elements (coefficient of smoke formation from 50 to 500 m²/kg)
- class ДΠκ2 on smoke-forming ability by combustion (minimum luminous flux more than 60 %)
- corrosive class Kk2 of combustion products of non-metallic elements (the number of halogen hydrides less than 150 mg/g, pH more than 4.3, specific conductivity less than 10 μ S/mm)

Notes:

When ordering it is neccesary to agree the factory length of the product with the manufacturer

^{*} Long permissible current loads are calculated for the following conditions: conductor temperature 90 °C, air temperature 30 °C, soil temperature 20 °C, thermal resistivity of soil 1.5 °K • m/W, laying depth in the soil 0.8 m, while laying in flat formation the distance between cables in clear is equal to the cable diameter, while laying in trefoil formation cables are laid side by side, shields are earthed on both ends of the line

^{**} The external diameter may differ from the rated up to \pm 10 %

^{***} Отклонение фактической массы брутто от указанного значения может составлять $\pm\,7\,\%$

АПвЭгаАкПнг-30 1x120 ТУ У 31.3-00214534-058:2007

Single-core power cables with aluminium conductor, flame-retardant, with XLPE, aluminium-wire armoured, with longitudinal and transverse screen sealing, with polymer compound outer sheath

CONSTRUCTION

- 1. Aluminium multiwire compacted conductor
- It is possible to manufacture cable with a single-wire conductor
- It is possible to manufacture cable with sealed conductor.
- 2. Inner extruded semiconducting layer
- 3. XLPE insulation
- 4. Outer extruded semiconducting layer
- 5. Lapping layer of semiconductive swellable tape
- 6. Copper screen
- 7. Lapping layer of semiconductive swellable tape
- 8. Alumopolymer tape
- 9. Extruded bedding of polyethylene
- 10. Aluminium-wire armour
- 11. Flame-retardant polymer compound outer sheath

Note: It is possible to manufacture cable with extruded semiconductor layer along outer sheath
