Signal blocking cables with copper conductors, with polyethylene insulation, in aluminium sheath, with double-steel-tape armouring, in polyethylene hose

Designed for electrical installations of railway signaling, centralization, blocking and automation at a rated voltage of 380 V AC at frequency 50 Hz or 700 V DC

Cables are used for laying:

- · in soil
- · at external electrical influences
- in places, where small mechanical impacts on cable are possible, including tensile forces
